

## Concentration

It's easy to make a concentration game, and really fun to play on a rainy summer day. You need crayons, a pair of scissors, glue and cardboard to make the game.

1. Print out the concentration pictures.
2. Colour the pictures.
3. Glue the concentration pictures onto the cardboard
4. After the glue dries, cut out the playing cards and your concentration game is ready!

**Tip!** You can make the game more difficult by colouring the card pairs with different colours.
